TECHNICAL

- JavaScript
- TypeScript
- ReactJS
- NodeJS
- NextJS
- React Native
- Java
- Golang
- Firebase
- Terraform
- GCP

EXPERIENCE

SENIOR SOFTWARE ENGINEER

AVLYON | 2024 NOVEMBER TO PRESENT

At Avlyon, I served as a Senior Software Engineer, where I managed a team of 3 engineers and held full responsibility for high-level and low-level system designs, project delivery, and team management. My work involved architecting a company-wide workflow management system using a micro-frontend architecture built with TypeScript, React, and Next.js. Additionally, I led the development of an integrated solution for a fitness-related client that included an Admin Portal, Mobile Application, and Google Cloud Functions as the backend service. I also designed and delivered a scalable e-invoicing platform using Golang, ensuring high-performance service delivery and seamless system integration for business-critical operations.

SENIOR SOFTWARE ENGINEER

CIRCLES LIFE | 2021 FEBRUARY TO 2024 NOVEMBER

At Circles, I serve as a Senior Software Engineer within the Telecommunications domain, leading the end-to-end design and development of scalable solutions across web, mobile, and backend platforms. I manage a team of 6 engineers and am responsible for low-level designs, project delivery, and team management. My work involves architecting high-performance frontend interfaces for the Customer Portal and Admin Portal using TypeScript, JavaScript, and React.js, alongside developing cross-platform mobile applications with React Native. On the backend, I implement robust and reliable Reward and Notification microservices using Java and Golang to ensure seamless integration, reliability, and global scalability across all products.

EXPERIENCE (CONTINUED)

● FULLSTACK ENGINEER

SPRII | 2019 APRIL TO 2021 FEBRUARY

At Sprii, I worked as a Full Stack Engineer, developed scalable web and mobile apps using Next.js, React Native, and Node.js. Managed cloud infrastructure on GCP, automated deployments with Terraform, and optimized performance across frontend and backend systems.

● FRONTEND ENGINEER

NETSTARTER | 2018 JUNE TO 2019 APRIL

As a Frontend Engineer, I worked on Magento-based eCommerce frontends using React and jQuery, developing responsive, high-performance interfaces and enhancing user experiences through modern UI practices.

● SOFTWARE ENGINEER

VIRTUSA | 2016 DECEMBER TO 2018 JUNE

As a Software Engineer at Virtusa, I worked on Pega Systems to design, develop, and maintain business process management solutions, focusing on workflow automation, system integration, and performance optimization for enterprise clients.
